

Viking Net LLC builds and secures it all, **from the cabling in the wall to the AI agent on the server**. One small, cleared-eligible team covering networks, cybersecurity and digital forensics, AI and automation, software, and custom hardware, delivered nationwide and worldwide from a San Antonio (JBSA) home base. Owner-operated with no overhead and no subcontractor markup: **indicative pricing below, final quote on scope**.

Networks, Systems & Storage

Project or \$120/hr

MANAGED \$150 TO \$500/MO PER SITE

Design, build, and operate secure networks and systems end to end: Ubiquiti and UniFi fleets, Cisco IOS and Juniper JUNOS, firewalls, VPN, custom Wi-Fi, fiber and structured cabling, VSAT, microwave, and Starlink transport, plus 24/7 monitoring. Storage at every scale: NAS and SAN from a small-office unit to enterprise arrays, snapshots and replication, GFS backup and disaster recovery, and virtualization from a single host to clusters. Multi-site rollouts, Point-of-Presence and data-center standup, and managed support on a monthly per-site plan.

Cybersecurity & Digital Forensics

See packages

VIKING NET DEFENSE

OSINT-driven scam and fraud investigations, threat and posture assessment, network defense, and incident response through the Viking Net Defense practice. Lawful, evidence-based reporting; not a fund-recovery service.

Platform Vetting , is this legit, before you invest	\$149 to \$249
Victim Forensic Report , full investigation and evidence chain	\$499 to \$899
Enhanced Investigation , wallet tracing, domain clustering, takedown referral	\$1,500 to \$5,000
SMB Incident Response / Retainer , ongoing protection and response	From \$1,500/mo

AI & Automation Engineering

Project or \$120/hr

Custom AI agents for office, data-center, network, and full-system-analysis roles, air-gapped or guardrailed. Persistent AI memory, intelligent multi-model routing, and automated model intelligence. Workflow automation and data pipelines, deployable fully offline.

Software & Application Development

Fixed-scope or \$120/hr

Full-stack development in every major language, native apps for every Apple platform via Xcode (macOS, iOS, iPadOS, tvOS, visionOS) and Android, custom software, dashboards, and integrations. Buildable in closed, air-gapped environments.

Custom Hardware & Autonomous Systems

Quote by scope

Field-built cyber hardware and cyberdecks, custom drones with LiDAR and AI payloads, additive manufacturing (3D printing) for rapid prototyping, plus local, offline access control and smart surveillance. For authorized government and commercial use.

Government & Defense Services

Contract / Subcontract

Secure and classified network engineering, cross-domain and zero-trust security, and cleared-eligible support for DoD and Intelligence Community programs nationwide and worldwide, with rapid on-site response in the Joint Base San Antonio region. Available corp-to-corp, as a 1099 cleared consultant, or W2. UEI LQ25PZPB7MW3, NAICS 541512 primary.

How pricing works. Labor is \$120 per hour; most work is delivered as a fixed-scope quote after a short scoping call, or on a monthly managed or retainer plan. Numbers above are indicative starting points. Custom-built and yours to keep: no recurring vendor license or subscription fees. Service contracts available, never required.
